

Quality Policy

It is the policy of EnviroWrap Solutions Limited to provide its customers with a high quality service by meeting specified contractual requirements for the supply of high specification protective sheeting, and thereby sustaining a reputation for service excellence and so ensuring business growth.

This policy is achieved through meeting the requirements of the Management System described in this Business Manual, which in turn ensures compliance with the ISO9001:2008 Standard, as well as any statutory and regulatory requirements applicable to the industry.

Continuous improvement of the business is facilitated through measuring the performance of the delivered product, and in particular the key business objectives (**see 1.4 of Business Manual Volume 1**), then acting upon the results of these measures to ensure any perceived shortcomings are acted upon.

To this end, the quality management system is continually subject to review and is enhanced wherever possible based on both internal measures and input from customers.
