

ENVIROWRAP© NEW TENSIONING INSTALLATION SYSTEM

An example of two completed projects on Live Operational Petrochemical Plant.

1.0 – Dow Chemicals Polyplant Holland;

The plant area was being extended and upgraded whilst the Plant remained in full production. Five areas of the plant extending to approximately 3,000m² was encapsulation using the new EnviroWrap© Tensioning System. These included;

- ✓ Large Storage Tank Area.
- ✓ Sub-Station
- ✓ Loading Bay
- ✓ Temporary Workshop
- ✓ Temporary Stores

Below are examples of the installations carried out:

Above is the Encapsulation around Tanks

Above is a Temporary Workshop

The new EnviroWrap© Tensioning System allows contractors to have a High Quality Guaranteed containment where it had previously been impossible, such as;

Off-shore – Plant Pre-stop - High fire risk zones - Nuclear Installations – Sensitive Conservation Areas.

Only ones imagination can limit the possibilities of EnviroWrap© Containments.
